Hallo,

nice pictures. The VS-56 is in good original condition I would say. The blue electrolytic caps should be replaced.

By the way. I bought last week a Telewatt V-333 on ebay. Just for fun. Eager to see what comes and if I get it going again: <https://www.ebay.de/itm/325511251985>

Yesterday it came. A view hours later it began to work again. Without Phono Inputs in the first step.

Best regards
Karl
