Radio TITAN, beautiful name, but otherwise simple and very cheap radio. Preserved for generations to come.

Hello Jan,

the chassis looks very similar to the first version of "Volksempfänger VE301W", but the housing is precious craftsmanship. Unfortunately, there are only few stations left today to listen to.

Regards,

Ronald from Germany

Thanks for your comment, yes you are right, simple and cheap designs are very similar.

Yes, there are few stations, but private stations are starting to broadcast on MW here, albeit with less power

Good health!
